GX/HX BLOWER SHIPPING BRACKET

Date: April 23, 2010

Tech Bulletin #: TB10.002

Enertech Manufacturing has added a blower shipping bracket on the opposite side of the blower motor that needs to be removed before start up. *This only applies to Compass and Revolution vertical units.*

The attachment shows the location of the shipping bracket.

## **THIS BRACKET MUST BE REMOVED.**

Remove the two (2) screws shown and then slide the shipping bracket off the motor shaft before unit start up. Dispose of the bracket and the screws.

### **REMOVAL OF SHIPPING BRACKET**
